Structured courses. Real skills.
A smarter learning marketplace.

STUDENT · TEACHER · ADMIN

PROJECT VISION

Practical learning with trusted outcomes

ONE CONNECTED PLATFORM

Students

Discover and purchase structured study material.

Teachers

Create learning material and manage curricula.

Ramlogics

Controls approvals, branding, quality governance and website content.

Trusted outcomes

Students track progress, complete assessments and receive verifiable certificates when requirements are met.

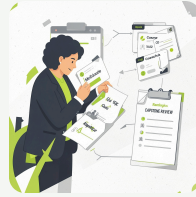

Three connected user experiences

STUDENT

Learn

Register, discover courses, enrol, purchase, learn, attempt quizzes, submit projects and view certificates.

TEACHER

Create

Onboard, create courses, upload material, build quizzes, review capstones and track earnings.

SUPER ADMIN

Govern

Manage approvals, users, orders, enquiries, certificates, reviews, CMS and branding settings.

Discover the right course

Start with the homepage

Ramlogics branding, hero messaging, course categories, featured courses, instructor profiles, testimonials and FAQs.

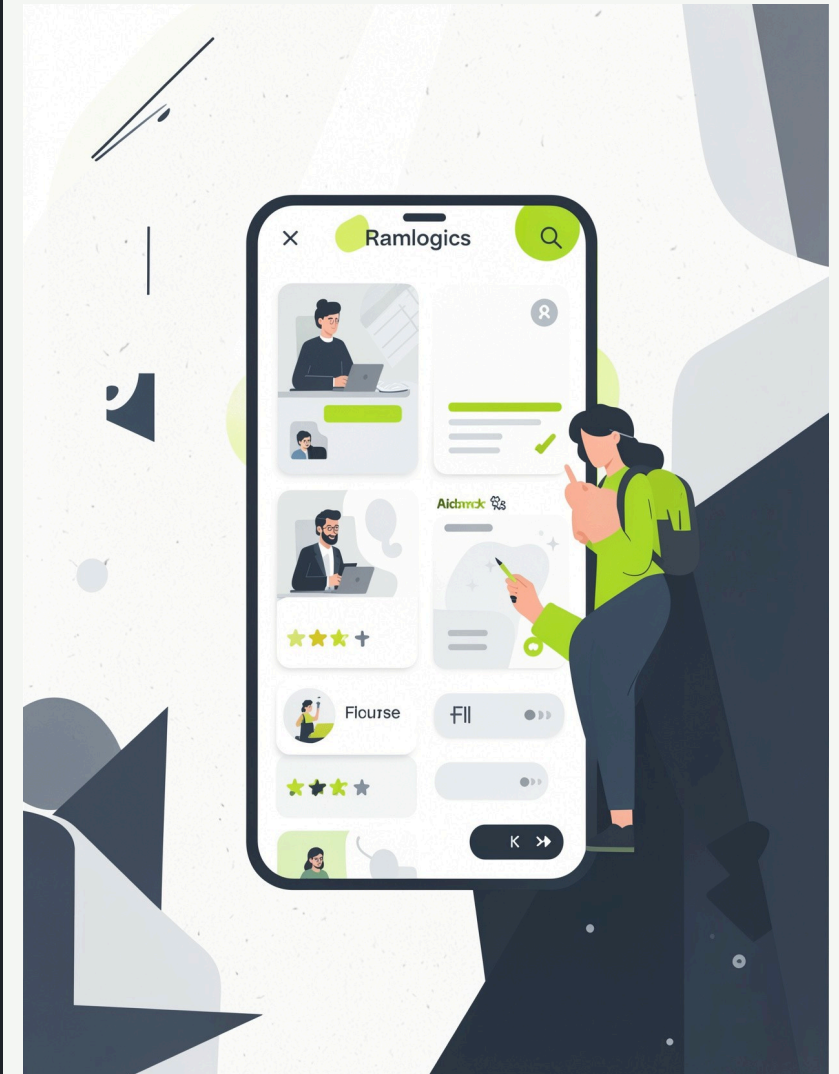

Search and filter

Find courses by topic or keyword, with category, level and free/paid filters. Sort by popularity, newest or price.

Choose with confidence

Course cards show pricing, instructor, rating, lesson count and duration. Details include outcomes, prerequisites, curriculum, previews, capstone requirements, reviews and purchase controls.

The learning journey: enrol, learn, assess, complete

1. Enrol in a course.
2. Complete required lessons.
3. Pass each quiz according to its configured pass mark.
4. Submit and receive approval for the capstone when required.
5. Receive a certificate when completion requirements are met.

Rich course content supports different learning modes

Video

Embedded or uploaded video lessons.

PDF

In-page study document viewer.

Reading article

Structured course explanations.

Notes

Revision material and checklists.

Quiz

Multiple-choice assessment with a configured pass mark.

Capstone project

Practical project submission reviewed by the teacher.

Create, manage and review

Onboard for approval

Capture profile, qualifications, expertise, experience and supporting documents for Ramlogics approval.

Build the course

Set title, outcomes, prerequisites, pricing, modules, lessons, uploads, quizzes and capstones.

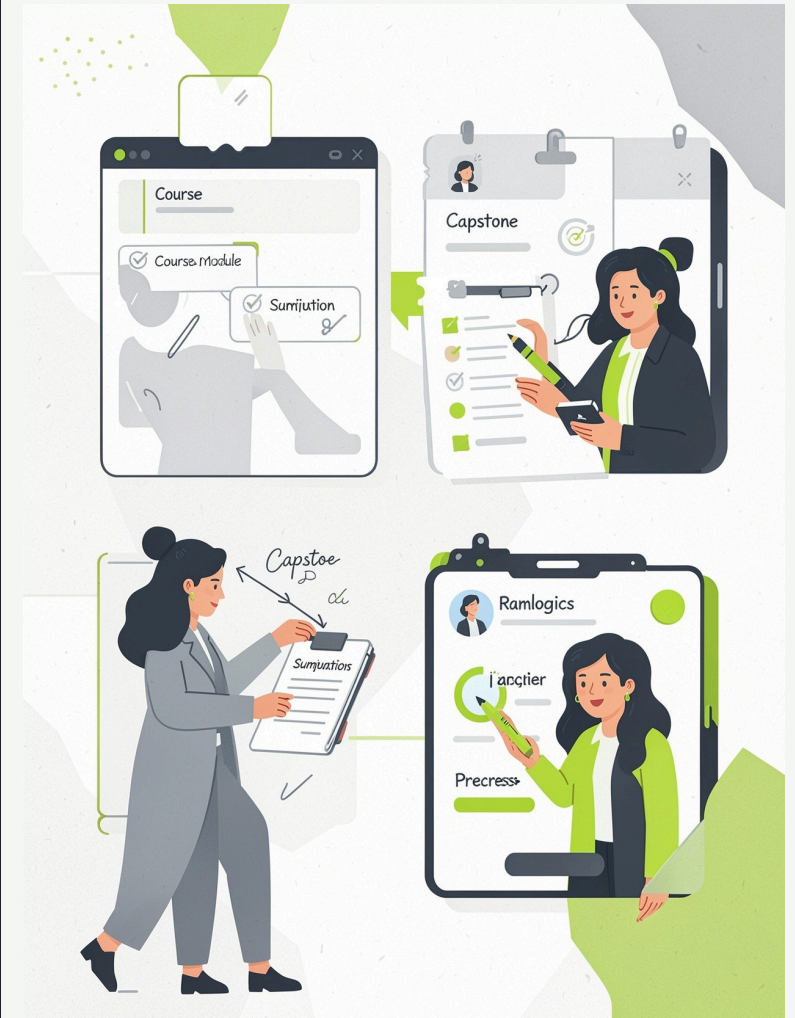

Manage the work

Track learner progress, give capstone feedback, view earnings, manage support tickets and update the account.

Current demo boundary

Teacher earnings are recorded, but automated bank payouts or Stripe Connect transfers are not included in the current demo.

Approvals and quality governance keep the catalogue trusted

Teacher approval

Create account, complete profile, submit application, then approve or request changes.

Course listing approval

Create course, add curriculum, complete readiness checks, submit for review, then publish or revise.

Capstone review

Finish lessons and quizzes, submit the project, receive teacher review, then approve or request revision.

Brand control

Ramlogics controls the platform and certificate identity while teachers supply learning content.

Super Admin control from one portal

Dashboard

Revenue; platform earnings; learners; courses; certificates; pending activity.

Management

Teacher, learner and course management: approval, moderation, access controls.

Commerce and trust

Orders; invoices; eligible refunds; enquiries; reviews; certificates.

Platform controls

CMS; branding; payment settings; administrator accounts.

Stripe payment integration turns interest into access

Course selection → student sign-in → Stripe Checkout → payment verification → paid order → course access.

01

Course selection → student sign-in.

02

Stripe Checkout: Hosted Checkout handles payment entry.

03

Payment verification: Verified payment creates paid-course access. Duplicate fulfilment is handled without duplicate enrolments.

Refund boundary: refunding a purchase removes associated access and revokes certificates linked to that purchase.
