Project overview

A role-based marketplace concept connecting healthcare facilities with equipment service professionals through requests, bids, and job status workflows.

Project narrative

BioMedTrace is a medical-equipment service marketplace concept for hospitals and imaging centers. Facilities can publish service requests; eligible technicians can submit proposals; facility teams can review bids and manage a job through completion or cancellation.

DOCUMENTATION NOTE

This summary uses the project information currently documented by Ramlogics. Unreported features, metrics, and outcomes are not assumed.

Documented scope and status

Product focus

- Service requests: Capture equipment, modality, location, urgency, and budget.
- Provider matching: Match approved technician coverage and supported modalities.
- Job lifecycle: Review bids and manage accepted jobs through closure.

Current status

Marketplace concept

Project focus

Role-based equipment service request, bidding, and job workflows.
