Project overview

A healthcare discovery prototype that organizes care pathways and demonstrates accessible service exploration and request flows.

Project narrative

CareWorld is a healthcare access website concept for discovering care pathways such as primary care, mental health support, condition management, dermatology, and nutrition. The documented scope includes a responsive public website, service discovery, guided care selection, and demonstration request flows.

DOCUMENTATION NOTE

This summary uses the project information currently documented by Ramlogics. Unreported features, metrics, and outcomes are not assumed.

Documented scope and status

Product focus

- Care discovery: Organize services into understandable categories.
- Guided pathways: Demonstrate service and care-channel selection.
- Prototype boundary: Request flows do not collect sensitive health data.

Current status

Product prototype

Project focus

Healthcare access prototype; not a clinical service.

SOURCE BASIS

Portfolio and project notes available to Ramlogics at the time of preparation. No performance claims or client outcomes are added without source evidence.
