PROJECT CASE STUDY

REAL ESTATE

DreamLand Real Estate Discovery Platform

A property discovery platform with location search, listing filters, interactive maps, property details, enquiries, and listing administration.

PROJECT PROFILE

INDUSTRY	PLATFORM	STATUS
Real Estate	**Real-estate discovery and listings**	**Project case study**

Prepared from available project documentation; no unsupported metrics are inferred.

Project overview

A property discovery platform with location search, listing filters, interactive maps, property details, enquiries, and listing administration.

Project narrative

DreamLand is a real-estate discovery platform designed to make property search more visual and organized. The documented product scope includes searchable listings, location-based discovery, filters and sorting, property detail pages, interactive maps, enquiry forms, and protected listing administration.

DOCUMENTATION NOTE

This summary uses the project information currently documented by Ramlogics. Unreported features, metrics, and outcomes are not assumed.

Documented scope and status

Product focus

- Property search: Refine listings by location, price, bedrooms, and type.
- Listing details: Present property information, imagery, and maps.
- Administration: Manage property listings and enquiries.

Current status

Project case study

Project focus

Structured property discovery with enquiries and listing administration.
